

Users (Network)

Published: 2025-04-05

The Users page displays a list of active users observed on network traffic and provides activity data such as which devices the user recently accessed and whether the user was a participant in a detection. To view the Users page, click **Assets** from the top navigation menu and then click **Users** in the left pane.

Note: These network users are not associated with user accounts for the ExtraHop system.

You can refine results in the Users table by [adding search filter criteria](#) in the Find Users section.

Username ↑	Protocol	Devices	Detections	Last Seen
aacosta@patch...	LDAP	DESKTOP-W37WFDJ	4	2024-04-23 11:05:29
iharkimo@patc...	CIFS, NTLM	VPN Client 172.16.0.10, RDS EC2, RDS PGSQL, + 2 more	3	2024-05-08 11:05:29
milak@fruit.lex...	CIFS, LDAP	workstation-it-admin-01	2	2024-05-04 11:05:29
rhoood@corp.20...	CIFS, KRB, LDAP, NTLM	winserver-prod1.patchtuesdays.com, webserver00.patchtuesdays.com	3	2024-05-04 11:05:29

The Users table displays the following details for each user observed during the selected time interval.

User Detail	Description
Username	The username that is extracted from observed network traffic or an authentication protocol or application, such as LDAP or Active Directory.
Protocol	The protocols observed on devices that the user has accessed.
Recent Devices	<p>The devices that the user has accessed, ordered by the most recent first.</p> <p>Tip: You can find devices associated with a specific user by adding the Username filter to a device search.</p>
Detections	<p>The number of detections in which the user was directly observed in the detection traffic as a participant.</p> <p>Participant usernames are pulled from the protocol associated with the detection and can only be observed in the following protocols: FTP, Kerberos, LDAP, NTLM, RDP, RPC, and SMB.</p>
Last Seen	Timestamp when the user was last observed on the network.

Click a user in the table to open the Details pane and display several links that enable you to investigate any devices or detections associated with the user .
