

Load and manage a saved activity map

Published: 2018-07-07

You can view, update, or delete saved activity maps. First, you must first create a new map to access a list of saved and shared maps.

1. Log into the Web UI on the Discover or Command appliance.
2. [Create an activity map](#) and then click the **Open** icon in the upper right corner, as shown in the following figure.

3. Choose one of the following activity map options:
 - To load a map, click the map name. If you want to modify and then re-save the map, make your changes and then click the **Save** icon.
 -  **Tip:** You can also modify the properties for a saved map by clicking the command menu  and then clicking **Map Properties**.
 - To delete a map, select the checkbox next to the map name and then click **Delete**.

 **Note:** Users must have privileges to view or interact with activity maps. See [User privileges](#) in the ExtraHop Admin UI Guide.
