

Load and manage a saved activity map

Published: 2020-02-23

You can view, update, or delete saved activity maps. First, you must first create a new map to access a list of saved and shared maps.

1. Log into the Web UI on the Discover or Command appliance.
2. [Create an activity map](#), and then click the Open icon  in the upper right corner of the page.
3. Choose one of the following activity map options:

- To load a map, click the map name. If you want to modify and then re-save the map, make your changes and then click the **Save** icon.

Tip: You can also modify the properties for a saved map by clicking the command menu  and then clicking **Map Properties**.

- To delete a map, click **Delete** next to the map name.

Note: Users must have privileges to view or interact with activity maps. See [User privileges](#) in the ExtraHop Admin UI Guide.
