

Set a global display theme

Published: 2020-02-23

You can set a global, visual theme for the entire ExtraHop Web UI. Themes are applied to all Web UI pages for the current user on the appliance and persist across different browsers and different computers.

1. Log into the Web UI on the ExtraHop Discover or Command appliance.
2. Click the User icon at the top right corner of the page.
3. Under Theme, select a theme. Options include light, dark, and space.

Tip: If you want to display a specific page with a different theme, for example, for better visualization of a dashboard in a NOC, you can override the global theme by modifying the page URL. Append the following parameter to the end of the URL:

```
&theme={light | dark | space}
```

For example:

```
https://your-eda.com/extrahop/#/Dashboard/Y968F/?  
from=30&interval_type=MIN&until=0&theme=dark
```
