

Create a PDF file

Published: 2021-08-28

You can export data from a dashboard, protocol page, or individual chart as a PDF file.

1. Find the dashboard or protocol page that contains the data you want to export and complete one of the following steps:
 - To create a PDF file of the entire page, click the command menu  in the upper right corner of the page and select **Print** (from the Discover appliance) or **Export to PDF** (from the Command appliance or Reveal(x) 360).
 - To create a PDF file of an individual chart or widget, click the chart title and select **Print** (from the Discover appliance) or **Export to PDF** (from the Command appliance or Reveal(x) 360) from the drop-down menu.
2. A PDF preview dialog opens. Complete one of the following steps:
 - Click **Print Page** and then select **PDF** as the destination from the print settings in your browser.
 - From a Discover appliance, click **Print Widget** and select **PDF** as the destination from the print settings in your browser.
 - From a Reveal(x) 360 or Command appliance, select [PDF format customizations](#) and then click **Export to PDF**. The process for generating a PDF might take several seconds.

Tip: To access PDF print options through a keyboard shortcut, type `pp`.

Customize the format of a PDF file

When creating a PDF file of a dashboard or protocol page from a Command appliance or Reveal(x) 360, you have several options for customizing the appearance of your PDF file.

1. Type a custom name for your PDF file or accept the default name.
2. Choose one of the following page width options:

Narrow

Displays large text in chart titles and labels, but provides less space for displaying chart data. Long chart titles and labels might be truncated.

Medium

(Recommended) Displays a view of chart titles, legends, and data that is optimized for portrait page orientation.

Wide

Displays small text in chart titles and labels, but provides more space for displaying chart data.

3. Choose one of the following page break options:

Single page

Displays the entire dashboard or protocol page on a single, continuous page. This setting might generate a PDF file that is larger than standard printer page sizes.

Page break per region

Displays each chart region on an individual page.

4. Choose one of the following themes:

Light

White background with dark text.

Dark

Black background with white text.

Space

Dark background with a stylized background image and text.

5. Click **Export to PDF**.

The process for generating a PDF might take several seconds.

Next steps

The PDF file will download to your local computer. Each PDF file includes the dashboard title and time interval. Click **View report on ExtraHop** to open the original dashboard set to the time interval specified in the PDF file.
