

Set a global display theme

Published: 2021-03-17

You can set a global visual theme for the ExtraHop system, excluding Administration settings. Themes are applied to all pages for the current user and persist across different browsers and computers.

1. Log in to the ExtraHop system through `https://<extrahop-hostname-or-IP-address>`.
2. Click the User icon at the top right corner of the page.
3. Under Theme, select a theme. Options include light, dark, and space.

Tip: If you want to display a specific page with a different theme, for example, for better visualization of a dashboard in a NOC, you can override the global theme by modifying the page URL. Append the following parameter to the end of the URL:

```
&theme={light | dark | space | contrast}
```

For example:

```
https://<extrahop-hostname-or-IP-address>/extrahop/#/Dashboard/Y968F/?from=30&interval_type=MIN&until=0&theme=dark
```
