

Create a device tag

Published: 2021-10-06

Tags are user-defined labels that you can attach to a device. Tags can help differentiate devices on the ExtraHop system that share a common attribute or characteristic. You can then search for devices or create dynamic device groups based on the device tag.

Note: You cannot rename a device tag after it is created.

Note: You can also [automate this task through the REST API](#).

1. Log in to the ExtraHop system through `https://<extrahop-hostname-or-IP-address>`.
2. Click the System Settings icon  and then click **Tags**.
3. Click **Create**.
4. In the **Name** field, type a unique name for the tag.
5. Optional: To immediately add the new tag to a device, complete the following steps:
 - a) Click **Select a device**.
 - b) Type a device name, IP address, MAC address, or hostname.
 - c) Select the device from the search results.
The device name appears in the window, indicating that the new tag will be added to this device.
6. Click **Save**.
The new tag appears in the Manage Tags window.
7. Click **Done** to close the window.

Tip: You can also add a tag from a Device Overview page. [Find a device](#) and then click the device name. From the [Device Overview page](#), click **Edit Properties**, and then click **Tags**.
