

Integrate Reveal(x) 360 with Splunk

Published: 2022-10-26

This integration enables you to view network threat detections and behavioral insights from Reveal(x) 360 in Splunk.

To configure this integration, you must [create Splunk integration credentials](#) and then add them to the configuration of the [ExtraHop Add-On for Splunk](#).

System requirements

ExtraHop Reveal(x) 360

- Your user account must have [privileges](#) on Reveal(x) 360 for System and Access Administration.
- Your Reveal(x) 360 system must be connected to an ExtraHop sensor with firmware version 8.8 or later.
- Your Reveal(x) 360 system must be [connected to ExtraHop Cloud Services](#).

Splunk

- You must have Splunk version 8.1 or later.

Create Splunk integration credentials

1. Log in to Reveal(x) 360.
2. Click the System Settings icon  and then click **Integrations**.
3. Click the **Splunk** tile.
4. Click **Create Credential**.
The page displays the generated ID and secret.
5. Copy and store the ID and secret, which you will need to configure the ExtraHop Add-On for Splunk.
6. Click **Done**.

The credential is also added to the [ExtraHop REST API Credentials](#) page where you can view the credential status, copy the ID, or delete the credential.

Next steps

[Install and configure the ExtraHop Add-On for Splunk](#).

Install and configure the ExtraHop Add-On for Splunk

1. Download the [ExtraHop Add-On for Splunk](#) from the SplunkBase site.
2. Install and configure the add-on according to the following documentation:
 - [About Installing Splunk Add-Ons](#)
 - [ExtraHop Add-On for Splunk Details](#)
3. In the following configuration fields, enter the [credentials](#) you created and copied for the Splunk integration:
 - **Client ID**
 - **Client Secret**

Next steps

Export Reveal(x) 360 detections and metrics and view them in Splunk according to the instructions in the [ExtraHop Add-On for Splunk Details](#).
