Add a device to the watchlist

Published: 2023-04-22

Add devices to the watchlist to ensure Advanced Analysis. You can add a custom device to the watchlist, but you cannot add an L2 parent device to the watchlist, unless the device is a gateway or router, and you cannot add a device in Flow Analysis. Devices stay on the watchlist whether they are inactive or active, but a device must be active for the ExtraHop system to collect Advanced Analysis metrics.

Tip: Instead of adding several devices to the watchlist, create a device group ☑ and then prioritize that group for Advanced Analysis ☑. Or add multiple devices to the watchlist from the Device list page. Click the checkbox next to one or more devices and then click the Add to Watchlist icon ★ in the upper right corner.

Learn more about Analysis Priorities Z.

- 1. Log in to the ExtraHop system through https://<extrahop-hostname-or-IP-address>.
- 2. Click **Assets** at the top of the page and then click **Devices** in the left pane.
- 3. Search for the device you want and then click the device name. The Device Overview page appears, which displays traffic and protocol metrics associated with the device.
- 4. Click Edit Properties.
