Integrate RevealX 360 with CrowdStrike Falcon LogScale

Published: 2024-05-15

This integration enables you to export security detections from RevealX 360 to LogScale to view detection data in a centralized system, enhancing context around detections and decreasing the time to confirm threats.

System Requirements

ExtraHop RevealX 360

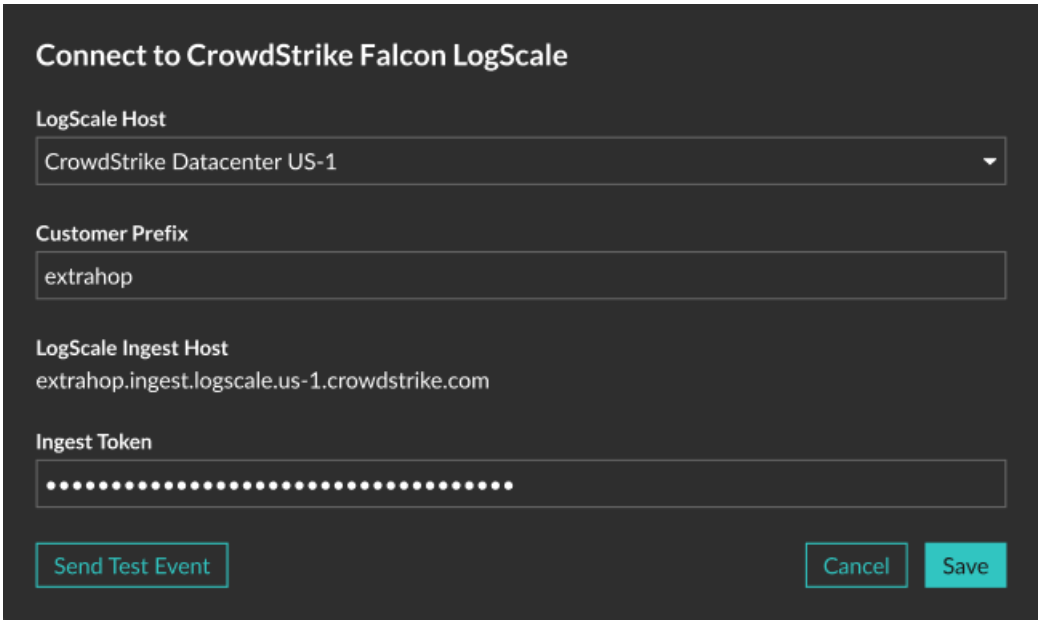
- Your user account must have privileges on RevealX 360 for System and Access Administration or Cloud Setup.
- Your RevealX 360 system must be connected to an ExtraHop sensor with firmware version 9.3 or later.
- Your RevealX 360 system must be connected to ExtraHop Cloud Services.

CrowdStrike Falcon LogScale

- You must have CrowdStrike Falcon LogScale version 1.92.0 or later.
- You must configure the LogScale HTTP Event Collector API for data ingest.

Configure the CrowdStrike Falcon LogScale integration

1. Log in to the RevealX 360 system.
2. Click the System Settings icon and then click **Integrations**.
3. Click the **CrowdStrike Falcon LogScale** tile.
4. From the **LogScale Host** drop-down list, select the hostname of your LogScale endpoint.
5. Optional: If you selected a CrowdStrike Datacenter as your host, type your customer subdomain in the **Customer Prefix** field. The prefix is added to the hostname and displayed in the LogScale Ingest Host field, similar to the following example:



6. In the **Ingest Token** field, type the ingest token you configured for the LogScale HTTP Event Collector.
7. Click **Send Test Event**, and then check that the event was received by your LogScale endpoint. It might take several minutes for the test event to arrive.
8. Optional: Configure the following integration options:
   a) Click **Export RevealX 360 security detections**.
   b) Click **Add Criteria** to configure the filter that determines which security detections are exported to your LogScale endpoint.
9. Optional: Click **Change Credentials** to update the LogScale hostname or the HEC token.
10. Optional: Click **Disable Integration** to keep the current credentials and options, but disable the LogScale integration.
11. Click **Save**.
