Set a personal default dashboard

Published: 2024-04-12

You can set a personal default dashboard that appears when you log in to the ExtraHop system and when you access the Dashboards page. If you do not set a personal default dashboard, the ExtraHop system displays the global default dashboard specified by your ExtraHop administrator.

1. Log in to the ExtraHop system through `https://<extrahop-hostname-or-IP-address>`.
2. At the top of the page, click **Dashboards**.
3. From the dashboard dock, select the dashboard you want to set as your personal default.
4. In the upper right corner of the page, click the command menu ⋮ and click **Set as Default Dashboard**. A yellow star appears next to the name in the dashboard dock.

Next steps
Click **Clear as Default Dashboard** before setting a different default dashboard.
