Create a threat briefing notification rule

Published: 2025-01-04

You can create a notification rule that emails a recipient list whenever a new threat briefing is published or automatically restored. Briefings are automatically restored if they are updated with content changes or new detections.

Before you begin

- Users must be granted NDR module access and have full-write privileges ⬀ or higher to complete the tasks in this guide.
- The ExtraHop system must be connected to ExtraHop Cloud Services ⬀ to send notifications through email.
- Email notifications are sent from no-reply@notify.extrahop.com. Make sure to add this address to your list of allowed senders.

1. Log in to the ExtraHop system through `https://<extrahop-hostname-or-IP-address>`.
2. Click the System Settings icon ⚙ and then click **Notification Rules**.
3. Click **Create**.
4. Click **Threat Briefing**.
5. Type a unique name for the notification rule in the Name field.
6. In the Description field, add information about the notification rule.
7. Specify individual email addresses, separated by a comma.
8. In the Options section, the **Enable notification rule** checkbox is enabled by default. Deselect the checkbox to disable the notification rule.
9. Click **Save**.
