

Set a language

Published: 2024-08-07

You can select a language from the User menu to view available content in that language. User interface pages and content that have been translated are automatically displayed in your selected language; otherwise, content is displayed in English.

1. Log in to the ExtraHop system through `https://<extrahop-hostname-or-IP-address>`.
2. Click the User icon at the top right corner of the page.
3. Select a language from the **Language** drop-down list.
4. Close the User menu and refresh the page to view translated content.
