Prioritize groups for Standard Analysis

Published: 2025-01-10

You can specify device groups for Standard Analysis based on their importance to your network. Groups are ranked in an ordered list.

Here are some important considerations about Standard Analysis Z:

- Devices prioritized for Standard Analysis section receive Advanced Analysis when there is capacity.
- You must have full write privileges to edit analysis priorities.
- You cannot prioritize more than 200 device groups for Standard Analysis.
- 1. Log in to the ExtraHop system through https://<extrahop-hostname-or-IP-address>. (These steps must be completed on the console or sensor that is managing these shared settings **Z**.)
- 2. Go to the settings for Standard Priorities.
 - On a console, click the System Settings icon 🏶 and then click **Analysis Priorities**. Then, click **Edit Priorities** next to the sensor you want to modify.
 - On a sensor, click the System Settings icon 🏶 and then click Analysis Priorities.
- 3. Prioritize groups by completing the following steps:
 - a) In the For Standard Analysis section, click **adding a group** to add the initial group or **Add Group** to add additional groups.

For Standard Analysis

Prioritize devices to receive Standard Analysis by adding a group.

GROUP	
HTTP Servers	
NOTE	

- b) In the **Group** drop-down menu, type the name of a device group and then click the group name from the search results. For example, type HTTP servers and select the **HTTP Servers** device group.
- c) Optional: In the **Note** field, type information about the group.
- 4. In the Automatically Fill section, make sure **On** is selected.

Note: If your system is having performance issues, then click **Off**. Only devices that are in prioritized groups receive Standard Analysis.

5. At the top of the page, click **Save**.

Next steps

Here are some additional ways to manage and refine groups that receive Standard Analysis:

If you add multiple groups, the groups are prioritized from top to bottom. Click the upper left icon next • to Group, and then drag the group to another position in the ordered list.
